

## ORGANO Ultrapure Water Technology

Full-model change of  $\alpha$  series with enhanced operability and water dispensing function

# Ultrapure water system FP- $\alpha$ series Pure water system PR- $\alpha$ series

ALPHA

### Ultrapure water system FP- $\alpha$ series

► For ultratrace metal analysis, organic analysis, bio experiment, etc.

FP-0120 $\alpha$ -UT1 (UF spec with TOC meter)

Standard price : JPY1,367,000

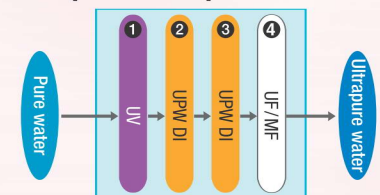

FP-0120 $\alpha$ -MT1 (MF spec with TOC meter)

Standard price : JPY1,229,000

FP-0120 $\alpha$ -M01 (MF spec)

Standard price : JPY 829,000

#### Ultrapure water production flow

\*-M01 does not incorporate UV.

### Pure water system PR- $\alpha$ series

► For general analysis/inspection, supply for ultrapure water, alternative to a distiller, etc.

PR-0015 $\alpha$ -XT1 (ASTM Type II grade with TOC meter)

Standard price : JPY1,284,000

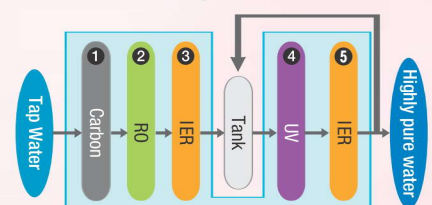

PR-0015 $\alpha$ -X01 (ASTM Type II grade)

Standard price : JPY 893,000

PR-0015 $\alpha$ -001 (Basic spec)

Standard price : JPY 683,000

#### Pure water production flow

\* -X01/-XT1's flow.

### Ultrapure water system UP- $\alpha$ series

► For organic analysis, bio/environmental analysis, other inspection, etc.

UP-0090 $\alpha$ -TU1 (UF spec with built-in 3L tank)

Standard price : JPY1,036,000

UP-0090 $\alpha$ -TM1 (MF spec with built-in 3L tank)

Standard price : JPY 964,000

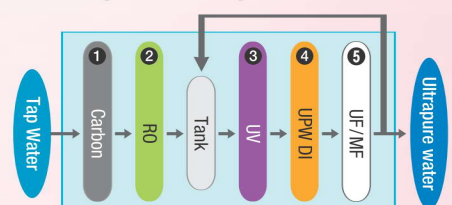

UP-0090 $\alpha$ -OU1 (UF spec, requiring external tank)

Standard price : JPY1,000,000

UP-0090 $\alpha$ -OM1 (MF spec, requiring external tank)

Standard price : JPY 927,000

#### Ultrapure water production flow

\* -TU1/-TM1's flow.

## High-performance dispenser for **el** series **NEW**

### ● One-drop water dispensing function

Dispensing volume from one drop to 2L/min is adjustable with dial by hands. Without washing bottles, diluting in measuring flask is possible with stable and smooth drop dispensing.

\*-NA1's dispensing is fixed with 1.5L/min.

### ● Excellent arm design for easy water dispensing

Widely moving (backward/forward, up/down, right/left) without stress is possible.

### ● Multifunction touch panel

Adopt waterproof touch panel with excellent operability, visibility, and functionality. It can be operated with experimental gloves.

### ● Optional UV for water dispensing can be selected

Reduce pollution risk from external environment right before water dispensing.

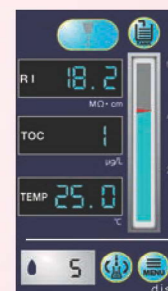

### ● Max 3 dispensers to be connected

It can extend use points with additional water dispensers.

DS- $\alpha$ -S01 (Adjustable dispensing volume, fixed-volume & foot-switch dispensing, UV) Standard price : JPY522,000

DS- $\alpha$ -001 (Adjustable dispensing volume, fixed-volume & foot-switch dispensing) Standard price : JPY451,000

DS- $\alpha$ -NA1 (Fixed-volume & foot-switch dispensing) Standard price : JPY336,000

Monitor

## Pure water tank for **el** series **NEW**

### ● Equipped with vent filter for CO<sub>2</sub>

It can prevent tank water pollution from external CO<sub>2</sub>.

### ● Optional UV for tank to be selected

Effective for preventing bacteria. Replacing UV lamp is not required.\*  
Not consumable.

### ● 4 sizes of tanks depending on water usage can be selected

You can get tank water from attached tap.

20L Standard price : JPY300,000 (With UV : JPY345,000)

30L Standard price : JPY336,000 (With UV : JPY427,000)

60L Standard price : JPY445,000 (With UV : JPY536,000)

100L Standard price : JPY491,000 (With UV : JPY582,000)

\*Assuming Organo's standard operation for use and 10 years of equipment life.
